New Possibilities Opened To Sweden

STOCKHOLM - Now and then the pattern of a brave new world comes through despite the confusions of the moment. That happened when news of the successful splitting of the atom was first made known. Here in Scandinavia, it opened a sudden vista of possibilities for a fuller, richer life. The newspapers carried columns on what it could mean for northern Europe, so long dependent on for-

No one of the Scandinavian countries alone could construct an atomic-energy plant for peaceful purposes, but the three together could pool their resources of technology and science in order to build a plant which would be jointly owned and operated. Under the late President Roosevelt the labor bosses acquired such political power that they were able to frustrate every effort to true up the lopsided situation created by the Wagner Act and render futile every attempt to restrict their autocratic power.

AT THE last session, though public sentiment was deeply stirred by the wave of great strikes culminating in the coal and railroad strikes which really took the nation by the throat, Congress was unable to enact any of the several proposals to correct what seemed to have become an intelerable state of affairs. #### OTHER NEWS OF COURT HOUSE

Food costs for prisoners in the Lawrence county jail go up immediately, following the general trend ship, \$1, of groceries, shoe laces, cigars and pickled tripe. Following a hearing upon a petition of Sheriff Frank L. Coen, Judge W. Walter Braham upped the daily food allowance for prisoners in the jail from 45 cents to 60 cents

Sheriff Coen showed that his foodstuffs had gone up and said it was impossible to feed prisoners decently for 45 cents per day. No opposition was offered by the county commissioners, Solicitor William McElwee, Jr., stating that the commissioners did not oppose the petition but appeared for the record. If 60 cents per prisoner shows a surplus at the end of the year the surplus goes back into the county treasury anyway. ### British Diplomat Beseeches Russia To Soften Tactics

Lord Vansittart Wants Soviet To Abandon Anti-American, British Attitude

LONDON, Sept. 27.—(INS)—Lord Vansittart of Denham, British diplomat and author, Thursday called upon Russia to abandon her violent anti-American and anti-British propaganda and soften her attitude in international conferences.

in international conferences.

Until the Soviet government makes clear-cut moves in those directions, Lord Vansittart said. Premier Joseph Stalin's declaration of foreign policy must remain only words which the world cannot count

upon being translated into deeds.

In an exclusive interview with International News Service, Lord Vansittart, former British undersecretary of state for foreign affairs and lately chief diplomatic advisor to his majesty's government, said:

"Nowadays it is deeds, not words,

"If Stalin's declaration could be taken at its face value, it would be the most marvelous news since the end of the war.

"Fortunately, there are things that Russia can do which would show almost immediately whether Stalin's statement reflects the real Russian foreign policy or whether he is just putting up another camouflaged front."

Fascism's Foe
Lord Vansittart is well known to
the British people as an unrelenting
foe of Fascism and dictatorships.
He warned of Hitler's intentions
before the start of World War II,
and since V-E day he has advocated
a firm treatment for Germany in
contrast with the mild policy of
the British and Americans.
Of Stalin's "no war" statement,

Lord Vansittart said:

"We will soon know whether
Stalin means what he says or is just
talking.

"If he is ginger, then the first

"If, he is sincere, then the first thing he must do is to call off immediately his violent anti-American and anti-British propaganda campaign, which has been conducted by Moscow for so long.

"Also, if he means what he says and wants to contribute to the peace of the world, Stalin can drop his claims to the Dardanelles and Western Thrace.

Bulgaria Pressing
"I realize that the claim for
Thrace is being pressed by Bulgaria
but it is really Moscow since Bulgaria is a Russian satellite.

"Thirdly, if Stalin is sintere we can expect to see a considerable and immediate softening of the hard and bellicose attitude of the Russian delegation at the Paris peace conference.

"Those things would show if

Stalin's statement reflects the Russian policy, and they should be put into effect immediately if we are expected to take the Soviet premier's utterance at its face value."

Regarding Stalin's statement that Russia would not use Germany as a weapon against Western Europe

and the United States, Lord Vansittart said:
"It seems that Stalin is already administering the Russian zone of Germany contrary to the wishes and interests of Britain and the
